# The Global **Stapling Expert**

Isaberg Rapid AB is a Swedish company. It is active on a global market and sells its products in more than 140 countries. We have been a specialist company since 1936, offering complete ranges through three areas – OFFICE, TOOLS and OEM.

Our long experience and constant drive to make improvements enable us to quickly recognise and satisfy our customers' needs. Our position as a world leader is guaranteed through the continual development of new products and the improvement of existing products. Our market leadership is consolidated by the quality assurance derived through having our own manufacturing facilities in Sweden, China and France.

# HOBBY

# GARDEN

# Sales-boosting concepts

## PRO

**PRO** meets the day-to-day requirements of professional users and makes light work of a wide variety of jobs. Rapid's products also make for faster, more efficient work, which increases profitability.

## HANDY

**HANDY** enables Rapid to get a firm grip on what has now become a way of life. Handy gives do-it-yourselfers everything they need in tools for all the pressing jobs around the house.

## HOBBY

Rapid's **HOBBY** range sets no limits when it comes to home improvements. Quite the opposite! Rapid's Hobby range widens the scope. When it comes to home improvements with Rapid, the only limiting factor is the imagination of the user.

## GARDEN

First, there was the design boom - everyone wanted to make over their home. Now, it is the turn of the garden, and garden design is really booming. This desire is something we satisfy with Rapid **GARDEN** - a range that focuses on the desire and inspiration to transform a garden, to make it truly beautiful. To do so with the help of specialised tools of very high quality.

## The importance of comprehensive, **day-to-day commitment**

It is not easy to provide a relevant description of Isaberg Rapid's environmental work. Naturally, the company is accredited in accordance with ISO 14000, but there is much more going on, and at so many different levels - from the individual employee's choice of cycling instead of driving to work, to new research findings leading to the exclusion of hazardous substances from the manufacturing process. Because working actively with environmental issues is not about sitting back and being content with having invested in the world's most modern and environmentally friendly powder coating plant (which we have, of course, done). Instead, it's a matter of making daily improvements, as well as keeping up to speed on what is happening in environmental research and legislation.

### RAPID ENVIRONMENT POLICY

As a manufacturer of stapling products, Isaberg Rapid AB shall be among the leaders when it comes to environmental issues. We shall aim at an ecological, sustainable development and thereby take responsibility for future environmental issues along with the sound financial operations.

### THIS INVOLVES:

- Act according to relevant legislation, decrees, directions and other demands regarding the environment.
- Act to reduce and prevent pollution and to strive to attain continuous improvements.
- Aim at the efficient use of raw material and energy.
- Reduce the use of hazardous substances by eliminating or replacing these by less harmful ones.

# General rules for professional fixing

## THE STANDARD RULE

In the standard case the staple should be three times as long as the material to be fixed.

## RULES WHEN USING RESISTANT MATERIAL

For hard surfaces ensure that the staple length is twice that of the material you are fixing.

## RULES WHEN STAPLING FINE OR LIGHT MATERIALS

When working with fine or light material ensure that the staple length is 4mm longer than the material thickness.

# Select the staples to suit your requirements

## DECORATION AND FINISHING

Use fine wire staples when you need a less visible staple, for example when fixing textiles, fabrics, leather, decorative material, labels or posters.

## INSULATION AND BUILDING JOBS

Use a flat-wire staple when completing building and insulation work involving Skirting, PVC and paperboards.

## CABLE

Cable staples for securing low-voltage cables.

## CONSTRUCTION

Use narrow staples or brads for fixing through tough materials and where long depth is required. Particularly used for heavy-duty fixing, flooring, wood panelling, wall boards, frames, partitioning etc.

## STAINLESS

Quality stainless steel staples for use when a durable staple is required in adverse conditions.

Dual and professional driving 21P and 21B nails from 0,8 diameter up to 40mm. Ideal to fix thin mouldings very precisely and without leaving marks. With high power and low air consumption it gives a perfect result, close to invisible. The tool can be used with any kind of air compressor.

# A strong link

No one knows better than Rapid how important the actual staples are to the stapling results. If a Rapid stapling tool jams, it is usually due to having been loaded with the wrong size staples or low quality staples. For best results, always use Rapid original staples. It is also worth remembering that there are different staples for different jobs.

**FINE WIRE STAPLES :** Because they are made of fine wire, these staples are not so visible. Ideal for working in textiles, the fine wire has a minimal effect on the textile fibres. The hole left after removing these staples when masking off can be painted over without being covered with filler.

**FLAT WIRE STAPLES :** Flat wire affords a larger holding area against the material. Suitable for plastic and other non-fibrous materials.

**CABLE STAPLES :** Flat wire staples with a round crown for securing low-voltage cables.

**BRADS :** For carpentry. Available in versions without head (Rapid 9), with small head (Rapid 8/300), and a somewhat stronger version (Rapid 16) for heavier work.

**NARROW CROWN STAPLES :** Works like a double brad for fixing through tough materials and where long depth is required. Particularly useful for heavy-duty fixing, flooring, wood panelling, wall boards, frames, partitioning, etc.

# Practical and convenient

Using a glue gun and glue sticks has several benefits compared with using "ordinary" glue. One benefit is that glue sticks are non-toxic, which is reassuring for everyone, especially people with small children. The glue gun and glue stick method makes it simple to use the right amount of glue for the job, giving better adhesion and eliminating wastage. The glue sticks can be stored for many years without any deterioration in quality. Due to its non-toxic properties, avoids problems with keeping glue in the home.

**LEATHER :** Glue those damaged shoes or that torn suitcase with our leather glue. Glues leather, suede and imitation leathers, such as nubuck, etc.

**METAL :** Perfect when joining small metal items, jewellery, etc. Glues copper, pewter, brass, aluminium, iron, etc.

**PVC/CABLE :** For all PVC repairs. Secures cable, electrical wiring, fitted carpets, floor tiles, etc.

**TEXTILE :** Glue all textiles with our strong textile glue. Glues cotton, linen, skai, suede, cork, etc.

**SANITARY :** An excellent glue for tiles and ceramics. Also good as a sealer in bathrooms and other areas subjected to wet.

**WOOD :** Glues wood, particle board, plywood, mouldings, balsa wood, melamine, laminated plastic, etc.

**LOW TEMP :** Low temperature glue for materials like glass, ceramics, and polystyrene. Useful for arts and craft, hobby and floral decorations.

**LOW TEMP GLITTER GLUE :** An excellent glue for all types of decorations and heat sensitive materials. Useful for arts and craft, hobby and floral creations.

# Glue for all needs

The glue gun is the ultimate tool with many different uses – from craft activities to advanced technical uses. To get the best possible results for all applications we recommend the use of Rapid glue sticks.

For most home applications the multipurpose glue will give the best result. For advanced applications requiring a stronger and more robust bond, a suitable glue is required, purpose made to go with the materials that are to be joined. To find the most suitable glue for your application please see the table below.

When using hot glue we would make the following recommendations:

- Ensure the surfaces are clean, dry and free from grease, paint and varnish.
- Apply the glue to one surface only, this should be the least sensitive to variations in temperature.
- Apply the glue sparingly, a thinner layer will give a better bond.
- Avoid applying the glue to large areas and join the two layers to be bonded and soon as possible.
- Press together the joined surfaces.

Name	Format	Usage	Application temperature	Softening point	Viscosity	Open time	Set time
<b>HIGH TEMPERATURE GLUE</b>							
GEN-T	Ø 12	Transparent universal glue.	160–205 °C	84–88 °C	7–9 Pa.s. at 200 °C	20 sec	15 sec
ECO-T	Ø 12	Transparent universal glue.	160–205 °C	81–85 °C	7–9 Pa.s. at 200 °C	30 sec	60 sec
ASS	Ø 12	Wood, packaging, leather, cork and textile.	160–210 °C	77–87 °C	5.5–7.5 Pa.s. at 200 °C	45 sec	20 sec
PRO-T	Ø 12	PVC, plastic, cables, glass, porous material and fibrous material.	150–210 °C	82–84 °C	3–5 Pa.s. at 200 °C	35 sec	20 sec
PRO+	Ø 12	High performance applications. Multi purpose, metal, plastic, glass, wood and treated surfaces.	170–190 °C	80–96 °C	1.5–3.5 Pa.s. at 200 °C	30 sec	30 sec
PAC	Ø 12	Fast tack and packaging.	160–200 °C	101–140 °C	1–3 Pa.s. at 200 °C	8 sec	3 sec
PRO-B	Ø 12	White glue used for sanitary, cable and porous materials.	180–210 °C	70–84 °C	8–10 Pa.s. at 200 °C	25 sec	50 sec

**NOTE:** The ambient conditions e.g. temperature, can affect the bonding time and strength etc... Isaberg Rapid AB are constantly reviewing and improving their products, therefore we reserve the right to change the specification without warning.

## MASS MARKET

AS THE MASS MARKET SEGMENT continues to grow, and grow even faster than the total market of stationary products, Rapid now takes a leap forward to secure the position as one of the leading stapling and hole punching companies in the world. A whole new retailing concept is developed specifically for one-stop-shopping in super- and hypermarkets. The blister Emballage is adapted for quick purchase decisions and catches the consumers' eye with bargains and campaign like offers.

The line for this year constitutes of 26 products which all hold the guaranteed quality that Rapid products are known for, and these products are likewise guaranteed to grab attention in stores.

## STAPLES

The Mass Market range contains both regular and coloured staples. The Buy-two-get-three promotion packages include one free staple box and 2+1 packages make purchasing decisions very easy to make. The coloured staples make stapling much more fun!

## SMALL OFFICE

This category is for those who look for high performance products in the office.

## HOME OFFICE

These products are designed for everyone in need of a stapler or a hole punch in their home.

## SCHOOL

The products in this category have been packed mainly for students and school children and are perfect for back-to-school campaigns.

*Impulse buying*  
The packaging concept grabs attention and is specially designed to promote spontaneous purchases. Always right – along the aisles, near the checkouts and for special displays and demonstrations.

# HOBBY

“Fun to Fix”

Decoration and home improvements are hobbies that are growing at an explosive rate. Rapid's Hobby range caters the increased demand. The concept is designed to promote enthusiastic, impulse purchases. Attractive, inspiring pictures on the packs are as important as the products themselves. Rapid's range is complete and fully up-to-date on the trends.

Rapid shows that home improvements can be easy and lots of fun – with the right tools. Inspiration is often the very factor that triggers a purchase.

# HANDY

“Do it now!”

DIY : Do-it-yourself is a lifestyle and one that is expanding like crazy. Rapid is a player that understands the growing requirements. We spearhead developments with an inspiring concept, target group oriented products, and attractive, smart packaging.

*Touch & Feel*  
This smart pack, which won the Worldstar 2004 award, enables the customer to feel the product without breaking open the pack.

*Clear packs with a clear focus on what the professionals want to know.*

# PRO

## “Top quality”

Rapid's experience enables us to always supply professional craftsmen with the very best. The products offer reliability that is necessary for daily use in the building trade. Leading designers and ergonomic experts helped Rapid to develop these professional tools for a wide range of professional needs.

*Uniform graphic design makes it easy for the customer to find the products on the shelves.*

# GARDEN

## “A need at any time of the 4 seasons”

Rapid Garden appeals to customers throughout the year. Four seasons means four distinct sales seasons, each one with a different theme. From spring planting, summer pottering and autumn harvesting to winter tidying and preparing for the next spring.

Our Garden range contains everything the customers are looking for - from the small FP20 that's ideal to fix the rabbit hutch, fasten the fence or tennis net to the new GP238 which is the perfect tool to fix your summer pottering.

*Green design and smart technology – a smooth shortcut when putting up netting and fencing.*
